DOLLY AZEEZ

TECHNICAL CONTENT DEVELOPER | AI-ASSISTED DEVELOPMENT | DIGITAL PRODUCTS

United Kingdom | +44 (0) 7511 097053 | dolapoazeez@hotmail.co.uk

PROFESSIONAL PROFILE

Digital product and Agile delivery professional with 8+ years of experience spanning websites, SaaS platforms, virtual event technology, QA and cross-functional delivery. Works with OpenAI Codex, Claude Code and GitHub workflows on AI-assisted software products, translating requirements into actionable development tasks, reviewing changes and coordinating testing and release preparation. Experienced in HTML email development, WordPress microsites, Python insurance scripts, SQL reporting and clear technical documentation.

RELEVANT SKILLS

AI-assisted development: OpenAI Codex, Claude Code, ChatGPT, Claude, GitHub, pull requests, CI checks, issue investigation and release reviews.

Web and software: HTML, CSS, JavaScript, React, WordPress, Dreamweaver, Python, SQL, Supabase, Vercel, ICE insurance SaaS, Mailchimp, APIs and integrations.

Delivery and communication: requirements definition, acceptance criteria, digital product testing, technical documentation, analytics reporting, Agile/Scrum, Jira, Azure DevOps, Confluence and Power BI.

SELECTED TECHNICAL PROJECTS

KULTRAE | AI-assisted fashion marketplace development | Ongoing

- Defined requirements and acceptance criteria for marketplace listings, seller profiles, admin workflows, checkout and UK/GBP launch controls.
- Used Codex-assisted GitHub workflows to coordinate changes, review pull requests and CI outcomes, and track release checks for Supabase/Vercel environments.
- Supported staging and deployment readiness while keeping the production deployment separate from a public launch.

Sevorify | AI social content platform | In development

- Developed product requirements and UX direction for AI-assisted social content creation using client photos and video, with planned editing, scheduling and posting workflows.
- Used Claude Code and Codex-focused workflows to review responsive design, investigate mobile navigation issues and organise software development tasks.

Client website projects | Web development

- Created business and ecommerce websites, including Dion Care Services, JOFF Care Services and Elidys Couture, with attention to site structure, presentation and user journeys.

PROFESSIONAL EXPERIENCE

Scrum Master & QA | Kortext | Aug 2022 – Present

- Translate user and product needs into prioritised backlog items and acceptance criteria for two cross-functional teams of seven working in two-week sprints.
- Improved sprint goal completion from 65% to 85% over six sprints and reduced average cycle time from eight to five days through refinement and impediment management.
- Produced Power BI reporting for 12 stakeholders and communicated delivery progress, risks and quality issues.

Project Manager (Scrum Delivery), Part-time Contract | PrescQIPP CIC | Aug 2020 – Jul 2022

- Coordinated website, webinar and process-improvement initiatives for NHS subscriber services, turning enquiries and feedback into prioritised tasks.
- Worked with IT, engagement, marketing and digital stakeholders on delivery requirements, subscriber communications, scheduling and live webinar support.

Digital Product Developer | Insync Insurance | Feb 2019 – Jul 2022

- Worked with the Digital Products Manager to plan, configure and manage insurance quote-and-buy websites using the ICE SaaS platform, taking ownership of delegated builds and deadlines.
- Coordinated stakeholder product testing, reviewed and pre-approved website user interfaces, and supported defect resolution before release.
- Assisted with automation workflows across marketing, sales and customer experience and monitored SQL reporting on digital product performance and return on investment.
- Wrote insurance scripts in Python and collaborated with developers through GitHub and Jira.

Digital Assistant | Production Bureau | Nov 2016 – Mar 2018

- Supported digital teams creating virtual event portals, event and communication apps, interactive content and touchscreen platforms.
- Built WordPress microsites and websites; coded HTML marketing emails in Dreamweaver and supported Mailchimp campaigns and weekly mailing trackers.
- Provided email support during live virtual events and collected event analytics for reports and post-event documentation.

EDUCATION & CERTIFICATION

BSc Computing | Canterbury Christ Church University • Level 3 ICT | Barking & Dagenham College

Certified ScrumMaster (CSM) | Scrum Alliance
